DETAILED ACTION

Applicants' response dated 10/18/2005 has been received and entered. Claims 170-192 are remain pending in the application.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 170-192 stand rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3, 8 and 9 of U.S. Patent No. 6,724,452.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both application and patent disclose the same an electrically controlled birefringence type liquid crystal display device having a first substrate including first domain regulating means, a second substrate including second domain regulating means, a negative dielectric constant anisotropy liquid crystal, vertical orientation layers, wherein first domain regulating means including protrusions bent in a zigzag shape (i.e., including first line and second line portions) and the second domain regulating means including an array of protrusions or

Art Unit: 2871

depressions or slips each being bent in a zigzag shape (i.e., including third line and fourth line portions) extending parallel to each other.

Terminal Disclaimer

3. The terminal disclaimer filed on 10/31/2005 is not accepted since an attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

Response to Arguments

4. Applicant's arguments filed 10/31/2005 have been fully considered but they are not persuasive as stated above (see paragraph 3).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2871

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
